Work experience

- Velocity Tech Inc.** **Toronto, ON, Canada**
INTERMEDIATE SOFTWARE ENGINEER
Since November 2022
 - Contributed to the development of [JobBliss](#), a serverless web application that connects freelancers with job opportunities and allows companies to find the right talent for their projects. The platform facilitates a dynamic environment where freelancers and in-house teams can collaborate seamlessly on projects, enhancing overall project collaboration. As a full-stack developer on the project, I authored serverless functions for backend operations and consumed them using Vue.
 - Played a key role in enhancing project visualization by creating UI mockups and prototypes using Figma, offering a clear representation of site functionality.
